- 5.9 If the freight payer does not have a VAT code number, Mainfreight is authorised to claim payment immediately when the assignment is issued.

Article 6 Rate calculation Method

The rates are based on a kg sliding scale per shipment, and are calculated in Euros (€).

6.1 Paying weight

The paying weight determines the weight sliding scale applicable to the quote.

The paying weight can be determined by taking the higher of :

- the actual gross weight
- the volume weight, which can be determined on the basis of the following premises:

6.2 Calculation

Our rates are calculated on the following basis:

• 1 m³ (coli) = 330 kg m³ = Length x Width x Height

1 loading meter = 1.750 kg
 loading meter = (Length x Width) / 2,4

Boxes (coli) - packing units:

<u> </u>		
Coli	Max weight 30 kg per unit	Calculation: m³
	Max 5 separate units accepted	Length x Width x Height x 330 kg
	(see also Article 7 Surcharges)	
Coli (>30 kg per unit)		Calculation: see loading meters (pallets)

Pallets:

	pallets the max height is 2.40 m.	volume weight based on m³ can be higher than

Bundles/Crates:

Between 401 cm and	Max weight 30 kg	Calculation based upon Boxes + 100 %

> 600 cm*	Max weight 30 kg	Calculation based upon Boxes + 150 %
	Weight > 30 kg	Calculation based upon Pallets + 150 %

^{*} The length surcharge is always calculated and invoiced over the entire shipment (and not just on the length itself)

When presenting hazardous materials, the customer has to ensure that the goods are in compliance with ADR rule 1.4.2.1.1 and the applicable national legislation. The customer is responsible for appropriate labelling, approved packaging, transport documents and the Dangerous Goods Declaration (multi-modal transport). If the shipment contains hazardous substances, the UN-number, substance name, label numbers and packing group must be announced to Mainfreight when confirming the order at the latest. This also applies for dangerous goods sent as "Limited Quantities".

Article 9 Terms of delivery

Mainfreight operates in accordance with the Incoterms of the international Chamber of Commerce (Incoterms 2020). These terms of delivery can be downloaded from our website https://www.mainfreight.com/belgium/en-nz/info-point.

Article 10 Transporters liability (national/international)

Whenever Mainfreight conducts international or national transport assignments, the CMR convention applies. These provide for a limitation of liability, which may limit the transporters' liability to less than the total value of the consignment. For full coverage of the actual value of the goods during transport, the client is strongly advised to insure goods against the risks of transport. A transport insurance (goods) policy offers several advantages: full compensation based on the value of your goods, no problems with the limited liability of the carrier, compensation in case of force majeure of the carrier etc. Damages excluded from cover are, for example, damage due to own intent or defects and damage caused by inherent vice or natural deterioration of a good. According to CMR conditions, your shipment is insured for the transportation price or possibly for the weight of the shipment. A transport insurance (goods) policy insures the total value of the shipment. Beware that you first must pay the transport invoice in the event of a claim – in accordance with the applicable CMR convention – if we agree to the claim, we will reimburse you pro rata. For any related questions regarding damage, please send an email to our claim services: claims.genk@be.mainfreight.com (Genk) or claims@be.mainfreight.com (Zwijnaarde).

Article 11 Reporting obligation for valuable consignments

The client warrants that the value of the consignment to be transported does not exceed € 50,000. Mainfreight accepts the assignment explicitly under this condition. If the value of the consignment to be transported is more than € 50,000, Mainfreight must be notified of the value in writing in advance of the transport. At the explicit request of the client, Mainfreight will attempt to contract supplemental insurance for the transport at the client's expense.

Article 12 Alcohol transport and excise administration

Alcohol transports must at all times be accompanied by the necessary documents that must be correctly formatted. Mainfreight can never be held responsible for the incorrect layout of documents. In the absence of this, € 15,00 will be charged for the request.

In accordance with Commission Regulation (EC) No 684/2009 of 24 July 2009, field 15 must be completed with the name and address of the first carrier. If it turns out that field 15 has not been filled in correctly, a violation must be retained. This violation is punished based on Article 47 of the Act of 22 December 2009 on the general regulation on excise duties, which foresees a fine of EUR 625 up to EUR 3,125.

It should also be noted that, in accordance with Article 21 §6 of the "Council Directive 2008/118 / EC of 16 December 2008 concerning a general scheme for excise duty and repealing Directive 92/12 / EEC" when sending excise goods under the suspension arrangement the goods must be accompanied by a printed copy of the electronic administrative document or any other commercial document clearly stating the unique administrative reference code (ARC). This document must be available to the administration at any request throughout the duration of the transfer.

If you do not have your own excise number, please contact us for more information about the preparation of the necessary excise documents and further settlement.

Article 13 EURO-pallet exchange

EURO-pallet exchange is the process whereby the sender of goods and the receiver of goods exchange EURO-pallets. The sender must clearly indicate on the transport order that the goods are placed on EURO-pallets. The receiver of the goods returns (exchanges) empty EURO-pallets to the sender. As a supplier of transport solutions Mainfreight has the capacity to facilitate the exchange process. EURO-pallet exchange is, subject to prior agreement between both parties (you and Mainfreight), a standardised process in the Benelux and Germany. Mainfreight does not exchange EURO-pallets for deliveries to other countries.

The actual exchange, whereby the receiver returns the same quantity of EURO pallets to Mainfreight as it has received one-to-one, takes place when the shipment is delivered. All EURO-pallets that cannot by exchanged one-to-one on delivery by the receiver are regarded as not exchanged. The obligation to exchange pallets then lapses. Mainfreight will not be obliged to return these non-exchanged EURO-pallets to the sender.

There is a surcharge for EURO-pallet exchange of € 2,50 per sent EURO-pallet. Although EURO-pallets are produced in a sustainable manner, they can nevertheless only be used a limited number of times within the normal quality standards. This is why Mainfreight uses a write-off percentage of 15%, which means that for every 100 exchanged EURO pallets, 15 pallets are not returned to the sender.

Mainfreight will draw up a balance sheet of EURO-pallets between Mainfreight and the sender. This balance sheet is then given to the sender as notification. After this balance is agreed, negotiation takes place on whether transactions must be planned in order to maintain the balance. This means that Mainfreight can send empty pallets to the receiver or collect them if Mainfreight is in credit with the receiver. The pallet balance can be settled to one year in the past. Mainfreight does not charge any fee for the maintenance of the administration of all EURO-pallet transactions and for drawing up the EURO-pallet balance sheets.

Article 14 Documentation/clearance/export declaration costs

To obtain the correct export documents, the following criteria must be met:

- For an invoice value higher than € 6.000,- the client must always apply for a EUR.1 certificate from the Chamber of Commerce where it is registered (assuming the goods originate from the EC).
- If the goods originate from outside the EC, the country of origin must be stated on the invoice.
- For invoice values less than € 6.000,- the client must state the required "invoice declaration" on the original invoice. The signature under the invoice declaration must always be an original, not a copy. The name of the person signing must always be printed under the declaration.
- Letter of credit (LC) processing € 30,00 per LC.

The client indemnifies Mainfreight for all damages and costs, of any designation whatsoever, resulting from the inaccuracy of the information supplied by the client, as well as all taxes and other levies by customs or other authorities for any reason whatsoever.

In case of LTL/FTL freight to and from the United Kingdom, we are obligated to use a Brexit surcharge that will apply to shipments over 3,500 kg taxable weight. The main reasons for this are the capacity problems due to driver availability in the United Kingdom and the substantial increase in our administrative costs after Brexit. Please find in attachment the new surcharge that will apply to these shipments.

In an international transaction, buyer and seller usually agree on an ICC Incoterms® 2010 or 2020 rule.
